

# NEBRASKA NURSERIES Beautiful Evergreens

**DWARF PFITZER JUNIPER**

Much slower growing than the regular Pfitzer and matures at only about one-half the size. Same beautiful foliage.

**HICKS' YEW HEDGE**

The waxy, deep green foliage makes an exceptionally attractive hedge for the north side of a house or in shady places.

**ARBOR-VITAE, HILL'S PYRAMIDAL**

Lacy foliage, bright green color and shapely even pyramidal habit of growth.

**HETZI GLOBE JUNIPER**

The blue-green spreading type of Juniper that lends itself to globe shape trimming very easily.

**AUSTRIAN PINE**

Pines available in Ponderosa, White, Scotch and Austrian. Plant as individual specimens or for background.

**MOERHEIM BLUE SPRUCE**

The aristocrat of evergreens, with the bright steel-blue sheen.

**MAGNOLIA SOULANGEANA**

Blooms measuring 4 to 5 inches across appear before the leaves in early spring. They prefer north and east exposure where the ground will stay frozen as late as possible in spring.

**REDBUD**

Artistic small trees with deep pinkish lavender blooms before the leaves appear.

**VARIEGATED DOGWOOD**

Beautiful foliage for arrangements—bark is bright red in the winter.

**WEIGELA, VANICEK**

Most outstanding new red flowering shrub. Soft ruby-red flowers—blooms profusely during spring and repeats in fall.

**EUONYMUS SARCOXIE**

New, upright growing evergreen shrub with dark green foliage. Makes a beautiful single specimen or hedge.

**PYRACANTHA KASAN**

(Bloom and Berries)

Whether it is used as an individual specimen or as a hedge, the evergreen foliage, white flowers and loads of brilliant berries, make it attractive all year.

**PYRACANTHA KASAN BERRIES**

Need help with landscape problems? Call IVanhoe 8-4848 for free suggestions and estimates.

**EUONYMUS VEGETUS**

Evergreen foliage—can be kept trimmed as a shrub or left grow informally as a vine.

**EUONYMUS PATENS**

We grow the small leaf variety, with glossy green foliage. Excellent for north side plantings, but does equally well in the shrub border.

**DOUBLE ALTHEA**

Available in red, white, pink and purple.

**CRANBERRY BUSH**

Attractive foliage, white flowers and lots of red fruit, make this shrub very desirable in the border or used as a hedge.

## LANDSCAPE PLANS

Every home has different problems of shade, privacy, etc. Moreover, in subdivisions, landscaping is one of the few ways to acquire uniqueness. Call for an appointment with one of our landscape designers.

**PIN OAK**

The most popular ornamental tree in this area. Fastest growing of the oaks.

**CANAERT  
PLUMOSA JUNIPER**

Very attractive variation of the Canaert. Foliage stays dark green all year.

**HICKS' YEW**

The most popular upright growing variety. Will grow luxuriantly on the north side of buildings or under shade trees. Foliage a waxy, deep blackish green.

**WELCH JUNIPER**

Grafted columnar type of scopulorm that retains its pyramidal habit of growth without much shearing. Foliage is bright silver-green.

**PFITZER JUNIPER**

**PFITZER JUNIPER**

Heavy sheared compact specimens that make an immediate showing. Will stand considerable shade and crowding, which makes it a great favorite both for foundation planting and for the shrub border.

## COTONEASTERS for HEDGING

**COTONEASTER ACUTIFOLIA**

The glossy dark green foliage makes it a beautiful boxed hedge or tall screen.

**COTONEASTER DIVARICATA**

A truly distinctive individual shrub or hedge. Small waxy green leaves with showy, bright red, egg-shaped fruit in the fall. Foliage used extensively for floral arrangements.
